Project Title

San Francisco State University, Certify the Final Environmental Impact Report and Approve the Campus Master Plan Revision with Enrollment Ceiling Increase

State Clearinghouse Number

2006102050

Lead Agency Contact Person

Simon Y. Lam, Associate Vice President for Capital Planning, Design & Construction – (415) 338-2541

**Project Location – City of San Francisco, Specific Campus – San Francisco State University
San Francisco County**

Project Description: Revisions to SFSU's Campus Master Plan to identify needed buildings, facilities, improvements and services to support campus growth and development from current enrollment of 20,000 full-time equivalent students ("FTES") to a new Campus Master Plan enrollment of 25,000 FTES by the 2020 academic year. To accommodate the projected student increase involves the near-term and long-term development of classroom, housing, and student support facilities. The 2007–2020 campus master plan adds 0.9 million gross square feet of academic and academic support space, including a conference center with guest accommodations. Through the gradual conversion of existing residential units in UPN and UPS for use by SFSU students and employees, and the redevelopment of selected parcels in denser configurations, the master plan adds approximately 1,200 units of housing for students, faculty, and staff, with 1,800 to 2,700 student beds. The master plan maintains the existing land use pattern with housing and other uses clustered around a compact academic core. New development occurs primarily through replacement and increased density of existing developed sites, thereby preserving valued open space for recreation, natural resources, and stormwater management. A strong pedestrian network, including a major east-west walkway and north-south pedestrian bridge, will link the campus internally and to the surrounding neighborhoods and provide universal access throughout.

This is to advise that the Trustees as the lead agency approved the above-described project on November 14, 2007 and have made the following determinations regarding the above-described project:

1. The project: will have a significant effect on the environment.
 will not have a significant effect on the environment.
