**NOTIFICATION OF NIGHT WORK at Block No 6 – Mixed Use Project**

**Dates:** Friday, February 08, 2019 thru Saturday, February 09, 2019.  
Friday, February 15, 2019 thru Saturday, February 16, 2019.  
**Times:** 8:00pm(Friday) - 5:00pm (Saturday)

Starting on above referenced date, Build Group will begin with the mat foundation pour of the block No 6 building. During these hours, there will be partial and full closures to Varela, Serrano and Cardenas. Concrete pumps will be staged around the project to service the job. Once set up, the pumps will be pouring concrete into the mat foundation of the building. Multiple concrete trucks will be providing concrete to each individual pump. This work occurs at night to:

1. Ensure safety to the general public and safety to our workers: The working hours are those that have the fewest pedestrians on the sidewalks and vehicles on the adjacent streets.
2. Minimize impacts to traffic flow, pedestrian flow, and MUNI services: Each work shift will include the delivery of several concrete trucks, which cause impact to the surrounding freeways and roads. By servicing the job after the evening traffic and Saturday traffic it ensures that as little congestion as possible to the highways and roads is caused by this operation.

We will also conduct a training session with the construction workers each night prior to the start of their shift to ensure they are aware of the importance of minimizing the amount of noise that they make while doing their work, and we will implement all means of keeping the noise to a minimum.

Furthermore, we also will be conducting a community outreach meeting on Tuesday January 29th, 2019 at 6:00 pm to inform neighbors of this upcoming work. This meeting will be held at the project jobsite located at 2 Varela Ave.

Thank you for your cooperation.
